- Agora (Video/Voice SDK) , Localization Support in Flutter , Payment Gateway, Google Maps, Git, GitHub.

Soft Skills

- Time Management, Problem solving, Communication, Collaborate, Innovative, Integrate
-

PROJECTS

Sulaimania

- Project Overview: Developed a Muslim app that allows users to read and listen to prayers, access Islamic books, view prayer times, and use an Islamic calendar. The app includes features such as bookmarks, compass, location services, audio playback and saving, localization, and offline data downloads for enhanced convenience.

Expense Management App

- **Project Overview:** Developed a feature-rich expense management app that helps users track and manage their finances efficiently.
- **Key Contributions:** Implemented Localization: Added support for multiple languages, enhancing the app's accessibility to a global audience. Ensured seamless integration of language resources for various user interfaces, improving user experience for non-English speaking users.

Login component

- **Project Overview:** Created a versatile Flutter login component supporting both OTP and password-based authentication, featuring secure API integration and a modular design for easy reuse across projects

UncleLau

- **Customer App:** Enables users to book and track service appointments, with features for live chat support, customizable preferences, and service reviews.
- **Technician App:** Allows technicians to manage job assignments, update statuses, and communicate with customers, with new GPS navigation and job reporting tools.
- **Partner App:** Provides service providers with tools for managing operations, tracking performance, and generating reports, including real-time analytics and customizable reporting features.

Real-Time Chat Component

- **Dual Communication Protocols:** Used Firebase Realtime Database/Firestore and WebSocket for low-latency, reliable messaging.
- **Media Support:** Enabled image, file, and audio sharing with Firebase Storage for secure handling.
- **Real-Time Updates:** Implemented Firebase Cloud Messaging (FCM) for instant message delivery and notifications.
